ELSEVIER

Thin Solid Films 317 (1998) 502–509

thin solid films

Subject Index of Volume 317

Absorption coefficient
Optical constants of thin films by means of a pointwise constrained optimization approach, 133
Adhesion strength
Evaluation of adhesion strength of Ti films on Si(100) by the internal stress method, 165
Ag-Se reaction, Ag_2Se Polymorphic phase transition
TEM study of Ag_2Se developed by the reaction of polycrystalline silver films and selenium, 72
Alacrite
Tribological properties of calcium fluoride-based solid lubricant coatings at high temperatures, 481
Al/a-Ge bilayer
Investigation of the kinetics of crystallisation of Al/a-Ge bilayer by electrical conductivity measurement, 34
Al(100) face
Surface melting of aluminum, 43
Alloy film
X-ray Magnetic Circular Dichroism study of vanadium in thin films (V/Ag(100) and V/Fe(100)) and alloys ($Fe_{0.82}V_{0.18}$/Au(111)), 314
Alloys
The changes of short range ordering in amorphous silicon–carbon alloys by thermal annealing, 206
AlN thin films
AlN thin films prepared by ion beam induced chemical vapour deposition, 100
Alumina substrates
RHEED study of Nb thin film growth on α-Al_2O_3 (0001) substrate, 183
Aluminium
Influence of the substrate temperature on silicon–carbon thin films deposited from SiH_4 and C_2H_4 by excimer lamp–CVD, 112
A comparison of the DC conduction properties in evaporated cadmium selenide thin films using gold and aluminium electrodes, 409
Improvement of tribological properties by ion implantation, 471
Aluminium oxide
AES and EELS study of aluminium oxide thin films, 77
Aluminium thin films
Columnar structures in polycrystalline thin films developed by competitive growth, 64
Aluminum
Surface melting of aluminum, 43
Preparation and structure of AlW thin films, 96
AlW alloys
Preparation and structure of AlW thin films, 96
Amorphous
Influence of the substrate temperature on silicon–carbon thin films deposited from SiH_4 and C_2H_4 by excimer lamp–CVD, 112
Investigation of the amorphous to microcrystalline phase transition of thin film silicon produced by PECVD, 144
The changes of short range ordering in amorphous silicon–carbon alloys by thermal annealing, 206
Elsevier Science S.A.
Amorphous alloy
Amorphous alloy formation and thickness dependent growth of Gd–silicides in solid phase thin film reaction, 417
Amorphous layers
Structure and photoinduced changes in As–S–Te bulk glasses and amorphous layers, 228
Amorphous materials
Undoped and doped crystalline silicon films obtained by Nd-YAG laser, 140
Amorphous silicon nitride films
Oxidation processes in hydrogenated amorphous silicon nitride films deposited by ArF laser-induced CVD at low temperatures, 214
Amorphous structure
Structure, composition and tribological properties of carbon nitride films, 384
Analogic detection
Thin films applied to integrated optical position-sensitive detectors, 421
Anisotropic growth
Anisotropic growth of Au and Ag on (001) WTe_2 and β-$MoTe_2$ surfaces between 350 and 700 K, 14
Annealing
In situ observation of microstructural changes of embedded silver particles, 21
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
The changes of short range ordering in amorphous silicon–carbon alloys by thermal annealing, 206
Structural and electrical characterisations of rapid thermal annealed thin silicon oxide films on silicon, 219
The effects of oxygen doping and annealing on the surface and bulk electrical conductivity in planar copper phthalocyanine thin films for gas-sensing applications, 432
Atomic
Fundamental structure forming phenomena of polycrystalline films and the structure zone models, 27
Effects of atomic hydrogen on growth behavior of Si films by Si_2H_6-source molecular beam epitaxy, 48
Atomic force microscope study of the early stages of NiO deposition on graphite and mica, 59
Quantum confinement effects on $Cd_{1-x}Ni_xTe$ sputtered films, 330
Au
Electromigration in gold thin films, 189
Auger electron spectroscopy
Study of Ni–Al interface formation, 55
Auger electron spectroscopy, AES
AES and EELS study of aluminium oxide thin films, 77
Auger spectroscopies
Depth-profiling via X-Ray photoemission and Auger spectroscopies of N^+ implanted tungsten carbides grown on the Ti–6Al–4V alloy, 477
Au/Si(111) system
Ellipsometrical studies on the Au/Si(111) system, 193

Ball-on-disc tribotesting
Structure, composition and tribological properties of carbon nitride films, 384
BFS (Bozzolo–Ferrante–Smith) method
Modelling of thin films via a semiempirical method, 1
Binary chalcogenic glasses
Derivation of the optical constants of thermally-evaporated uniform films of binary chalcogenide glasses using only their reflection spectra, 223
Boron nitride
Deposition time influence on cubic boron nitride thin films by tuned rf magnetron sputtering, 376
Brillouin light scattering
Elastic behaviour of Si/Ge superlattices determined by Brillouin light scattering, 255

Calcium phosphate coatings
Calcium phosphate coatings grown at different substrate temperatures by pulsed ArF-laser deposition, 363
Carbon
Deposition of carbon nitride thin films by arc ion plating, 380
Carburization
Improvement of Ta filament for diamond CVD, 371
Carrier concentration
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Cerium
Formation and evaluation of CeN thin films, 137
a-C:H
a-C(:H) and a-CN_x(:H) films deposited by magnetron sputtering and PACVD, 359
Chalcogenide glasses
Modulated differential scanning calorimetry experiments on film and bulk $(As_{0.33}S_{0.67})_{100-x}Y_x$, (Y = Te or I) glasses, 245
Chemical vapour deposition
Characterization of SiO_xN_y films deposited from $SiCl_4$ by remote plasma-enhanced chemical vapor deposition, 149
Chromium
Electrical property on copper thin film with chromium under-layer, 202
Chromium carbide
Multilayer coatings by continuous detonation system spray technique, 259
Chromium oxide
Multilayer coatings by continuous detonation system spray technique, 259
Co/Cu multilayers
Microstructural modification in Co/Cu multilayers prepared by low energy ion-assisted deposition, 278
Coefficient of friction
IBAD SiN_x coating: preparation and tribological properties, 490
Columnar morphology
Columnar structures in polycrystalline thin films developed by competitive growth, 64
Compostion
Relaxation mechanism of InGaAs single and graded layers grown on (111)B GaAs, 270
Computer experiment
Morphological analysis of discontinuous and semicontinuous metal films, 39
Condensation
The gas-phase condensation method for the preparation of quantum-sized ZnS nanoparticles, 497
Co/Ni(110)
Magnetic domain structure of Co/Ni(110), 298
Contact injection
Modelling conduction in asymmetrical discontinuous metal thin films, 178
Continuous detonation system
Multilayer coatings by continuous detonation system spray technique, 259
Copper
Preparation and characterisation of finemet amorphous magnetic thin films with enhanced Cu content, 294
Coppernitride
Preparation of a new tetragonal copper oxynitride phase by reactive magnetron sputtering, 282
Copperoxide
Preparation of a new tetragonal copper oxynitride phase by reactive magnetron sputtering, 282
Copper oxynitride
Preparation of a new tetragonal copper oxynitride phase by reactive magnetron sputtering, 282
Copper thin film
Electrical property on copper thin film with chromium under-layer, 202
Corrosion
Corrosion of TiN, (TiAl)N and CrN hard coatings produced by magnetron sputtering, 351
Coulomb gap
Modelling conduction in asymmetrical discontinuous metal thin films, 178
Crystallinity
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Crystallisation
Investigation of the kinetics of crystallisation of Al/a-Ge bilayer by electrical conductivity measurement, 34
Crystallization
Undoped and doped crystalline silicon films obtained by Nd-YAG laser, 140
Crystallographic
Control of crystallographic and magnetic texture in dc-magnetron sputtered Co–Cr on flexible PET substrate, 290
Crystals
Anisotropic growth of Au and Ag on (001) WTe_2 and β-$MoTe_2$ surfaces between 350 and 700 K, 14
Columnar structures in polycrystalline thin films developed by competitive growth, 64
Cu–O–N
Preparation of a new tetragonal copper oxynitride phase by reactive magnetron sputtering, 282
CVD
Oxidation processes in hydrogenated amorphous silicon nitride films deposited by ArF laser-induced CVD at low temperatures, 214

DC conduction
A comparison of the DC conduction properties in evaporated cadmium selenide thin films using gold and aluminium electrodes, 409
DC-excitation
Transparent and conducting ZnO(:Al) films deposited by simultaneous RF- and DC-excitation of a magnetron, 413
DC-magnetron
Chemical instability of the target surface during DC-magnetron sputtering of ITO-coatings, 405
Deposition time
Deposition time influence on cubic boron nitride thin films by tuned rf magnetron sputtering, 376
Diamond CVD
Improvement of Ta filament for diamond CVD, 371
Diamond film
Molecular mechanics simulation of the diamond nucleation and growth on silicon (001) and (111) surfaces, 6

Diamond-like carbon
Characterization of diamond-like carbon by Raman spectroscopy, XPS and optical constants, 397
Diamond-like carbon (DLC)
Field emission from amorphous diamond films prepared by filtered arc deposition, 356
Diamond-like nanocomposite coatings, DLN
Diamond-like nanocomposite coatings for low-wear and low-friction applications in humid environments, 402
Dichromated gelatin film
Diffraction gratings in dry developed dichromated gelatin films, 343
Dichromated gelatin films
Oxygen ECR stream etching of dichromated gelatin films, 340
Dielectric layer joint
AES, AFM and TEM studies of NiCr thin films for capacitive humidity sensors, 173
Diffraction
Diffraction gratings in dry developed dichromated gelatin films, 343
Discontinuous and semicontinuous metal films
Morphological analysis of discontinuous and semicontinuous metal films, 39
Discontinuous film
Modelling conduction in asymmetrical discontinuous metal thin films, 178
DSC technique
Modulated differential scanning calorimetry experiments on film and bulk $(As_{0.33}S_{0.67})_{100-x}Y_x$, (Y = Te or I) glasses, 245

ECD
Preparation of $Hg_{1-x}Cd_xTe$ ($0.1 \leq \times \leq 0.5$) epitaxial layers by two-stage evaporation–condensation–diffusion method, 105
ECR
Oxygen ECR stream etching of dichromated gelatin films, 340
Effective medium
New effective medium approach to optical response in non-random arrays, 446
Electrical conductivity
Magnetic and electrical transport properties of Fe/Zr and Fe/Ti multilayers, 306
Electrical conductivity measurement
Investigation of the kinetics of crystallisation of Al/a-Ge bilayer by electrical conductivity measurement, 34
Electrochemical
XPS/UPS studies of conducting polymers: exchange doping of dye molecules into polymer matrix, 367
Electrochemical modifications at the nanometer scale on Si(100) surfaces with Scanning Tunnelling Microscopy, 493
Electrodes
Yttria-stabilized zirconia obtained by MOCVD: applications, 241
Electromigration
Electromigration in gold thin films, 189
Electron beam evaporation
Characterization of indium–tin oxide films by means of ion-implanted nuclear probes, 161
Epitaxial metal/insulator superlattices of Ti–Ag/MgO grown on MgO(001) substrates, 249
Electron beam irradiation
Study by transmission electron microscopy and electron diffraction of thin polyethylene films, 232
Electron energy loss spectroscopy, EELS
AES and EELS study of aluminium oxide thin films, 77
Electronic structure
Influences of dopants on the electronic structure of SnO_2 thin films, 443
Electron Microscopy
Mirror electron microscopy investigations of thin polyethylene films subjected to high voltage, 235
Electron tunnelling
Modelling conduction in asymmetrical discontinuous metal thin films, 178
Electrostatic energy
Modelling conduction in asymmetrical discontinuous metal thin films, 178
Ellipsometrical studies
Ellipsometrical studies on the Au/Si(111) system, 193
Ellipsometry
Influence of the substrate temperature on silicon–carbon thin films deposited from SiH_4 and C_2H_4 by excimer lamp–CVD, 112
Characterization of diamond-like carbon by Raman spectroscopy, XPS and optical constants, 397
Epitaxial
RHEED study of Nb thin film growth on α-Al_2O_3 (0001) substrate, 183
Epitaxial growth
Simulation of epitaxial growth of CeO_2 on YSZ(100) and $SrTiO_3$ on MgO(100) for $YBa_2Cu_3O_{7-x}$ deposition, 81
Epitaxial layers
Preparation of $Hg_{1-x}Cd_xTe$ ($0.1 \leq \times \leq 0.5$) epitaxial layers by two-stage evaporation–condensation–diffusion method, 105
Epitaxial sputter
Defects and energy accommodation in epitaxial sputter deposited Mo/W superlattices studied by molecular dynamics, 10
Etching
Preparation of transparent conducting $Zn_2In_2O_5$ films by d.c. magnetron sputtering, 326
Evapouration
Study by transmission electron microscopy and electron diffraction of thin polyethylene films, 232
Excimer laser ablation
Deposition of hydroxyapatite thin films by excimer laser ablation, 393
Excimer lasers
Study of material emission in ArF and KrF excimer laser ablation of yttria stabilized zirconia single crystals, 108

Factor analysis
Study of Ni–Al interface formation, 55
Field emission
Field emission from amorphous diamond films prepared by filtered arc deposition, 356
Films
Preparation of transparent conducting $Zn_2In_2O_5$ films by d.c. magnetron sputtering, 326
Filtered arc deposition
Field emission from amorphous diamond films prepared by filtered arc deposition, 356
Finemet amorphous alloys
Preparation and characterisation of finemet amorphous magnetic thin films with enhanced Cu content, 294
Flat panel display
Field emission from amorphous diamond films prepared by filtered arc deposition, 356
FTIR spectroscopy
Oxidation processes in hydrogenated amorphous silicon nitride films deposited by ArF laser-induced CVD at low temperatures, 214

Gas plasma
Preparation of TiN_x thin films using r.f.–d.c. coupled magnetron sputtering in $Ar–N_2$ gas plasma, 93
Gas sensors
The effects of oxygen doping and annealing on the surface and bulk electrical conductivity in planar copper phthalocyanine thin films for gas-sensing applications, 432
A study of the response rate to nitrogen dioxide exposure in metal phthalocyanine thin film sensors, 436

Gd films
Amorphous alloy formation and thickness dependent growth of Gd–silicides in solid phase thin film reaction, 417
Glass
Structure and photoinduced changes in As–S–Te bulk glasses and amorphous layers, 228
Glass transition region
Modulated differential scanning calorimetry experiments on film and bulk $(As_{0.33}S_{0.67})_{100-x}Y_x$, (Y = Te or I) glasses, 245
Good adhesion
Structure, composition and tribological properties of carbon nitride films, 384
Graphite
Atomic force microscope study of the early stages of NiO deposition on graphite and mica, 59
Growth
Growth and microstructure of sputtered Ag/Cu multilayers, 266
Growth parameters
Growth and characterization of $AlAs_ySb_{1-y}$ and $InAs_ySb_{1-y}$ thin films on GaAs and InAs substrates, 52

Hall mobility
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Halogen-based sensitization
PbSe photodetector arrays for IR sensors, 425
Hard coatings
Corrosion of TiN, (TiAl)N and CrN hard coatings produced by magnetron sputtering, 351
Recent progress in the measurement of the thermal properties of hard coatings, 455
Heteroepitaxy
Molecular mechanics simulation of the diamond nucleation and growth on silicon (001) and (111) surfaces, 6
Hexamethyldisilazane
Deposition of silicon oxinitride films from hexamethyldisilizane (HMDS) by PECVD, 347
High Voltage
Mirror electron microscopy investigations of thin polyethylene films subjected to high voltage, 235
Humidity sensors
AES, AFM and TEM studies of NiCr thin films for capacitive humidity sensors, 173
Hydrocarbon films
Hydrocarbon films inhibit oxygen permeation through plastic packaging material, 388
Hydrogen
Effects of atomic hydrogen on growth behavior of Si films by Si_2H_6-source molecular beam epitaxy, 48
Hydroxyapatite thin films
Deposition of hydroxyapatite thin films by excimer laser ablation, 393
Hydroxylapatite
Calcium phosphate coatings grown at different substrate temperatures by pulsed ArF-laser deposition, 363

IBICVD
AlN thin films prepared by ion beam induced chemical vapour deposition, 100
Impedance spectroscopy
Electrical characterization of a thin film tin oxide sensor array for VOCs detection, 429
Indium oxide
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Indium–tin oxide
Chemical instability of the target surface during DC-magnetron sputtering of ITO-coatings, 405
Indium-tin oxide films
Characterization of indium–tin oxide films by means of ion-implanted nuclear probes, 161
InGaAs
Relaxation mechanism of InGaAs single and graded layers grown on (111)B GaAs, 270
In-plane orientation
Simulation of epitaxial growth of CeO_2 on YSZ(100) and $SrTiO_3$ on MgO(100) for $YBa_2Cu_3O_{7-x}$ deposition, 81
Interface structure
Molecular mechanics simulation of the diamond nucleation and growth on silicon (001) and (111) surfaces, 6
Internal stress method
Evaluation of adhesion strength of Ti films on Si(100) by the internal stress method, 165
Ion-assisted deposition
Microstructural modification in Co/Cu multilayers prepared by low energy ion-assisted deposition, 278
Ion beam
Investigation of ion beam mixing effects in Ta/Pd bilayers deposited on Si, 274
Ion beam assisted deposition
IBAD SIN_x coating: preparation and tribological properties, 490
Ion implantation
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Improvement of tribological properties by ion implantation, 471
Ion plating
Formation and evaluation of CeN thin films, 137
Deposition of carbon nitride thin films by arc ion plating, 380
Ion-plating deposition
Ion-plated discontinuous thin film strain gauges, 440
IR gas sensors
PbSe photodetector arrays for IR sensors, 425
Iron tungsten alloy
Synthesis of iron–tungsten alloy on mild steel by laser surface alloying, 468
Island film
Modelling conduction in asymmetrical discontinuous metal thin films, 178

Laser
Undoped and doped crystalline silicon films obtained by Nd-YAG laser, 140
Laser ablation
Simulation of epitaxial growth of CeO_2 on YSZ(100) and $SrTiO_3$ on MgO(100) for $YBa_2Cu_3O_{7-x}$ deposition, 81
Low-friction
Diamond-like nanocomposite coatings for low-wear and low-friction applications in humid environments, 402
Low-wear
Diamond-like nanocomposite coatings for low-wear and low-friction applications in humid environments, 402
Luminescence
Thin cathodoluminescent films deposited by sol–gel process, 336

Magnetic
Control of crystallographic and magnetic texture in dc-magnetron sputtered Co–Cr on flexible PET substrate, 290
Magnetic domain structures
Magnetic domain structure of Co/Ni(110), 298
Magnetization
Growth, structure, and magnetism of W and Fe/W thin films on Al_2O_3, 310
Magnetoelastic stress
Magnetostriction in a single-crystal $TbFe_2$ film, 303
Magneto–optic image
Magnetic domain structure of Co/Ni(110), 298

Magnetostriction
Magnetostriction in a single-crystal $TbFe_2$ film, 303
Magnetic and electrical transport properties of Fe/Zr and Fe/Ti multilayers, 306
Magnetron
Growth and microstructure of sputtered Ag/Cu multilayers, 266
Transparent and conducting ZnO(:Al) films deposited by simultaneous RF- and DC-excitation of a magnetron, 413
Magnetron ion plating
Microstructural modification of TiN deposited by magnetron ion plating: Influence of magnetic field configuration, 463
Magnetron sputtering
Preparation of TiN_x thin films using r.f.–d.c. coupled magnetron sputtering in $Ar–N_2$ gas plasma, 93
Deposition and characterization of multilayered TiN/ZrN coatings, 124
Microstructural modification in Co/Cu multilayers prepared by low energy ion-assisted deposition, 278
Magnetic vortices and pinning in thin films and superlattices, 285
Control of crystallographic and magnetic texture in dc-magnetron sputtered Co–Cr on flexible PET substrate, 290
New transparent conducting $ZnO–In_2O_3–SnO_2$ thin films prepared by magnetron sputtering, 318
Preparation of transparent conducting $Zn_2In_2O_5$ films by d.c. magnetron sputtering, 326
Corrosion of TiN, (TiAl)N and CrN hard coatings produced by magnetron sputtering, 351
a-C(:H) and a-CN_x(:H) films deposited by magnetron sputtering and PACVD, 359
Hydrocarbon films inhibit oxygen permeation through plastic packaging material, 388
Magnetron sputtering processes
In-situ analysis of particle contamination in magnetron sputtering processes, 85
Metal/insulator multilayers
Epitaxial metal/insulator superlattices of Ti–Ag/MgO grown on MgO(001) substrates, 249
Metals
In situ observation of microstructural changes of embedded silver particles, 21
Mica
Atomic force microscope study of the early stages of NiO deposition on graphite and mica, 59
Microcrystalline
Investigation of the amorphous to microcrystalline phase transition of thin film silicon produced by PECVD, 144
Microhardness
Structure, composition and tribological properties of carbon nitride films, 384
Microstructure
Growth and microstructure of sputtered Ag/Cu multilayers, 266
Mirror
Mirror electron microscopy investigations of thin polyethylene films subjected to high voltage, 235
MOCVD
Yttria-stabilized zirconia obtained by MOCVD: applications, 241
Modelling
Molecular mechanics simulation of the diamond nucleation and growth on silicon (001) and (111) surfaces, 6
Molecular beam epitaxy
Effects of atomic hydrogen on growth behavior of Si films by Si_2H_6-source molecular beam epitaxy, 48
Growth and characterization of $AlAs_xSb_{1-x}$ and $InAs_xSb_{1-x}$ thin films on GaAs and InAs substrates, 52
Molecular dynamics
Defects and energy accommodation in epitaxial sputter deposited Mo/W superlattices studied by molecular dynamics, 10
Morphological analysis
Morphological analysis of discontinuous and semicontinuous metal films, 39
MSIP
Preparation of a new tetragonal copper oxynitride phase by reactive magnetron sputtering, 282
Multilayer coating
Multilayer coatings by continuous detonation system spray technique, 259

Nanocrystalline composites
New development in superhard coatings: the superhard nanocrystalline-amorphous composites, 449
Nanocrystallisation
Preparation and characterisation of finemet amorphous magnetic thin films with enhanced Cu content, 294
Nanoparticles
Quantum confinement effects on $Cd_{1-x}Ni_xTe$ sputtered films, 330
The gas-phase condensation method for the preparation of quantum-sized ZnS nanoparticles, 497
Nb film
RHEED study of Nb thin film growth on α-Al_2O_3 (0001) substrate, 183
NiCr thin films
AES, AFM and TEM studies of NiCr thin films for capacitive humidity sensors, 173
Ni_xAl interface
Study of Ni–Al interface formation, 55
NiO deposition
Atomic force microscope study of the early stages of NiO deposition on graphite and mica, 59
Nitride
Formation and evaluation of CeN thin films, 137
Thermal stability of nonstoichiometric silicon nitride films made by reactive dc magnetron sputter deposition, 153
Deposition of carbon nitride thin films by arc ion plating, 380
Nitrogen dioxide
A study of the response rate to nitrogen dioxide exposure in metal phthalocyanine thin film sensors, 436
Non-random arrays
New effective medium approach to optical response in non-random arrays, 446
Nucleation
Anisotropic growth of Au and Ag on (001) WTe_2 and β-$MoTe_2$ surfaces between 350 and 700 K, 14

OES
Optical emission spectroscopy of rf glow discharges of methane–silane mixtures, 120
Optical band gap
Optical properties of zinc oxynitride thin films, 322
Optical constants
Derivation of the optical constants of thermally-evaporated uniform films of binary chalcogenide glasses using only their reflection spectra, 223
Optical properties
Ellipsometrical studies on the Au/Si(111) system, 193
Optical response
New effective medium approach to optical response in non-random arrays, 446
Oxide
Structural and electrical characterisations of rapid thermal annealed thin silicon oxide films on silicon, 219
New transparent conducting $ZnO–In_2O_3–SnO_2$ thin films prepared by magnetron sputtering, 318
Oxygen
Oxygen ECR stream etching of dichromated gelatin films, 340

Oxygen doping
The effects of oxygen doping and annealing on the surface and bulk electrical conductivity in planar copper phthalocyanine thin films for gas-sensing applications, 432
Oxynitride
Characterization of SiO_xN_y films deposited from $SiCl_4$ by remote plasma-enhanced chemical vapor deposition, 149
Optical properties of zinc oxynitride thin films, 322

PACVD
a-C(:H) and a-CN_x(:H) films deposited by magnetron sputtering and PACVD, 359
Particles
A model for stress in thin layers induced by misfitting particles. An origin for growth stress, 169
Particulate contamination
In-situ analysis of particle contamination in magnetron sputtering processes, 85
PbSe linear arrays
PbSe photodetector arrays for IR sensors, 425
Phase transformation
Phase transformation in sputtered Ti–SS alloy film during plasma nitriding, 458
Photoconductivity
PbSe photodetector arrays for IR sensors, 425
Photolithography
Diffraction gratings in dry developed dichromated gelatin films, 343
Plasma
Chemical instability of the target surface during DC-magnetron sputtering of ITO-coatings, 405
Plasma CVD
New development in superhard coatings: the superhard nanocrystalline-amorphous composites, 449
Plasma nitriding
Phase transformation in sputtered Ti–SS alloy film during plasma nitriding, 458
Polycrystalline films
Fundamental structure forming phenomena of polycrystalline films and the structure zone models, 27
Polycrystalline silver films
TEM study of Ag_2Se developed by the reaction of polycrystalline silver films and selenium, 72
Polyethylene thin films
Study by transmission electron microscopy and electron diffraction of thin polyethylene films, 232
Polymers
XPS/UPS studies of conducting polymers: exchange doping of dye molecules into polymer matrix, 367
Porous Si thin films
Spectroellipsometry and electron spectroscopy of porous Si thin films on p^+ substrates, 210
PSD
Thin films applied to integrated optical position-sensitive detectors, 421
Pulsed ArF-laser deposition
Calcium phosphate coatings grown at different substrate temperatures by pulsed ArF-laser deposition, 363

RAIRS
Spectroscopic characterization of thin solid films of 1,3 bis(3-chlorobenzylimido perylene) propane, 129
Raman
Characterization of diamond-like carbon by Raman spectroscopy, XPS and optical constants, 397
RBS
Deposition and characterization of multilayered TiN/ZrN coatings, 124
Reflection high energy diffraction
Epitaxial metal/insulator superlattices of Ti–Ag/MgO grown on MgO(001) substrates, 249
Refraction
Optical constants of thin films by means of a pointwise constrained optimization approach, 133
Refractive index
Deposition of silicon oxinitride films from hexamethyldisilizane (HMDS) by PECVD, 347
Resistivity
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
RF-excitation
Transparent and conducting ZnO(:Al) films deposited by simultaneous RF- and DC-excitation of a magnetron, 413
Rf glow discharges
Optical emission spectroscopy of rf glow discharges of methane–silane mixtures, 120
Rf magnetron sputtering
Deposition time influence on cubic boron nitride thin films by tuned rf magnetron sputtering, 376
Rf sputtering
Magnetic and electrical transport properties of Fe/Zr and Fe/Ti multilayers, 306
Quantum confinement effects on $Cd_{1-x}Ni_xTe$ sputtered films, 330
RF-sputtering
Transparent and conducting ZnO(:Al) films deposited by simultaneous RF- and DC-excitation of a magnetron, 413

Scanning Tunnelling Microscopy
Electrochemical modifications at the nanometer scale on Si(100) surfaces with Scanning Tunnelling Microscopy, 493
Scattering
Structure and elastic properties of thin alloyed gold films, 198
Secondary Ion mass spectrometry
High-resolution secondary ion mass spectrometry depth profiling of superconducting thin films, 237
Semiempirical method
Modelling of thin films via a semiempirical method, 1
Sensor arrays
Electrical characterization of a thin film tin oxide sensor array for VOCs detection, 429
Si/Ge superlattices
Elastic behaviour of Si/Ge superlattices determined by Brillouin light scattering, 255
$Si_{1-x}Ge_x$ layers
Surface roughness of strain-relaxed $Si_{1-x}Ge_x$ layers grown by two-step growth method, 17
Silicon
Influence of the substrate temperature on silicon–carbon thin films deposited from SiH_4 and C_2H_4 by excimer lamp–CVD, 112
Characterization of SiO_xN_y films deposited from $SiCl_4$ by remote plasma-enhanced chemical vapor deposition, 149
Thermal stability of nonstoichiometric silicon nitride films made by reactive dc magnetron sputter deposition, 153
Structural and electrical characterisations of rapid thermal annealed thin silicon oxide films on silicon, 219
Silicon etching
Electrochemical modifications at the nanometer scale on Si(100) surfaces with Scanning Tunnelling Microscopy, 493
Silicon oxinitride films
Deposition of silicon oxinitride films from hexamethyldisilizane (HMDS) by PECVD, 347
Silicon surfaces
Molecular mechanics simulation of the diamond nucleation and growth on silicon (001) and (111) surfaces, 6
Silver
In situ observation of microstructural changes of embedded silver particles, 21

SIN_x coating
IBAD SIN_x coating: preparation and tribological properties, 490
SiO_x
Hydrocarbon films inhibit oxygen permeation through plastic packaging material, 388
Si(100) surfaces
Surface roughness of strain-relaxed $Si_{1-x}Ge_x$ layers grown by two-step growth method, 17
SnO_2:Eu
Thin cathodoluminescent films deposited by sol–gel process, 336
SnO_2:Tb
Thin cathodoluminescent films deposited by sol–gel process, 336
SnO_2 thin film
Influences of dopants on the electronic structure of SnO_2 thin films, 443
Sol–Gel
Influences of dopants on the electronic structure of SnO_2 thin films, 443
Sol–gel process
Thin cathodoluminescent films deposited by sol–gel process, 336
SPE
Surface roughness of strain-relaxed $Si_{1-x}Ge_x$ layers grown by two-step growth method, 17
Spectra
Derivation of the optical constants of thermally-evaporated uniform films of binary chalcogenide glasses using only their reflection spectra, 223
Spectroellipsometry
Spectroellipsometry and electron spectroscopy of porous Si thin films on p^+ substrates, 210
Spectroscopic characterization
Spectroscopic characterization of thin solid films of 1,3 bis(3-chlorobenzylimido perylene) propane, 129
Spectroscopy
Investigation of the amorphous to microcrystalline phase transition of thin film silicon produced by PECVD, 144
Sputter deposition
Thermal stability of nonstoichiometric silicon nitride films made by reactive dc magnetron sputter deposition, 153
Sputtering
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Optical properties of zinc oxynitride thin films, 322
Microstructural modification of TiN deposited by magnetron ion plating: Influence of magnetic field configuration, 463
Tribological properties of calcium fluoride-based solid lubricant coatings at high temperatures, 481
Steel
Synthesis of iron–tungsten alloy on mild steel by laser surface alloying, 468
STM
Electromigration in gold thin films, 189
Stress
A model for stress in thin layers induced by misfitting particles. An origin for growth stress, 169
Structure
Structure and photoinduced changes in As–S–Te bulk glasses and amorphous layers, 228
Substrate
Control of crystallographic and magnetic texture in dc-magnetron sputtered Co–Cr on flexible PET substrate, 290
Superconductivity
High-resolution secondary ion mass spectrometry depth profiling of superconducting thin films, 237
Superhard coatings
New development in superhard coatings: the superhard nanocrystalline-amorphous composites, 449
Superlattices
Defects and energy accommodation in epitaxial sputter deposited Mo/W superlattices studied by molecular dynamics, 10
Magnetic vortices and pinning in thin films and superlattices, 285
Surface melting
Surface melting of aluminum, 43
Surface morphology
Study of material emission in ArF and KrF excimer laser ablation of yttria stabilized zirconia single crystals, 108
Relaxation mechanism of InGaAs single and graded layers grown on (111)B GaAs, 270
Surface protection
Multilayer coatings by continuous detonation system spray technique, 259
Surface wave's
Elastic behaviour of Si/Ge superlattices determined by Brillouin light scattering, 255

Ta filament
Improvement of Ta filament for diamond CVD, 371
Ta/Pd biyalers
Investigation of ion beam mixing effects in Ta/Pd bilayers deposited on Si, 274
$TbFe_2$ film
Magnetostriction in a single-crystal $TbFe_2$ film, 303
TCR
Electrical property on copper thin film with chromium under-layer, 202
TEM
TEM study of Ag_2Se developed by the reaction of polycrystalline silver films and selenium, 72
Temperature
Fundamental structure forming phenomena of polycrystalline films and the structure zone models, 27
Growth, structure, and magnetism of W and Fe/W thin films on Al_2O_3, 310
Thermal contact resistance
Recent progress in the measurement of the thermal properties of hard coatings, 455
Thermal properties
Recent progress in the measurement of the thermal properties of hard coatings, 455
Thickness
Growth, structure, and magnetism of W and Fe/W thin films on Al_2O_3, 310
Thin film products
In-situ analysis of particle contamination in magnetron sputtering processes, 85
Thin films
Modelling of thin films via a semiempirical method, 1
In situ observation of microstructural changes of embedded silver particles, 21
Preparation and structure of AlW thin films, 96
Optical emission spectroscopy of rf glow discharges of methane–silane mixtures, 120
Optical constants of thin films by means of a pointwise constrained optimization approach, 133
Electrical properties of ITO films prepared by tin ion implantation in In_2O_3 film, 157
Electromigration in gold thin films, 189
Structure and elastic properties of thin alloyed gold films, 198
High-resolution secondary ion mass spectrometry depth profiling of superconducting thin films, 237
Magnetic vortices and pinning in thin films and superlattices, 285
X-ray Magnetic Circular Dichroism study of vanadium in thin films (V/Ag(100) and V/Fe(100)) and alloys ($Fe_{0.82}V_{0.18}$/Au(111)), 314

New transparent conducting $ZnO-In_2O_3-SnO_2$ thin films prepared by magnetron sputtering, 318
Thin cathodoluminescent films deposited by sol–gel process, 336
A comparison of the DC conduction properties in evaporated cadmium selenide thin films using gold and aluminium electrodes, 409
Thin films applied to integrated optical position-sensitive detectors, 421
The effects of oxygen doping and annealing on the surface and bulk electrical conductivity in planar copper phthalocyanine thin films for gas-sensing applications, 432
A study of the response rate to nitrogen dioxide exposure in metal phthalocyanine thin film sensors, 436
Tribological properties of calcium fluoride-based solid lubricant coatings at high temperatures, 481
Thin film strain gauges
Ion-plated discontinuous thin film strain gauges, 440
Thin layer
Synthesis of iron–tungsten alloy on mild steel by laser surface alloying, 468
Thin layers
A model for stress in thin layers induced by misfitting particles. An origin for growth stress, 169
Thin polyethylene films
Mirror electron microscopy investigations of thin polyethylene films subjected to high voltage, 235
Thin solid films
Spectroscopic characterization of thin solid films of 1,3 bis(3-chlorobenzylimido perylene) propane, 129
Ti–6Al–4V substrates
Deposition of hydroxyapatite thin films by excimer laser ablation, 393
Ti films
Evaluation of adhesion strength of Ti films on Si(100) by the internal stress method, 165
Tin
Characterization of indium–tin oxide films by means of ion-implanted nuclear probes, 161
TiN
Microstructural modification of TiN deposited by magnetron ion plating: Influence of magnetic field configuration, 463
TiN_x thin films
Preparation of TiN_x thin films using r.f.–d.c. coupled magnetron sputtering in $Ar-N_2$ gas plasma, 93
Ti–SS alloy film
Phase transformation in sputtered Ti–SS alloy film during plasma nitriding, 458
Titanium
Improvement of tribological properties by ion implantation, 471
Transmission electron microscopic measurements
Epitaxial metal/insulator superlattices of Ti–Ag/MgO grown on MgO(001) substrates, 249
Tribological properties
Structure, composition and tribological properties of carbon nitride films, 384
Tungsten
Preparation and structure of AlW thin films, 96
Tungsten carbides
Depth-profiling via X-Ray photoemission and Auger spectroscopies of N^+ implanted tungsten carbides grown on the Ti–6Al–4V alloy, 477
Tunnelling
Ion-plated discontinuous thin film strain gauges, 440

UV–vis absorption
AlN thin films prepared by ion beam induced chemical vapour deposition, 100

Vacuum
Investigation of ion beam mixing effects in Ta/Pd bilayers deposited on Si, 274
Vapour pressure
Preparation of $Hg_{1-x}Cd_xTe$ ($0.1 \leq x \leq 0.5$) epitaxial layers by two-stage evaporation–condensation–diffusion method, 105
Volatile organic compounds
Electrical characterization of a thin film tin oxide sensor array for VOCs detection, 429

XMCD
X-ray Magnetic Circular Dichroism study of vanadium in thin films (V/Ag(100) and V/Fe(100)) and alloys ($Fe_{0.82}V_{0.18}$/Au(111)), 314
XPS
Formation and evaluation of CeN thin films, 137
Characterization of diamond-like carbon by Raman spectroscopy, XPS and optical constants, 397
Influences of dopants on the electronic structure of SnO_2 thin films, 443
XPS/UPS measurements
XPS/UPS studies of conducting polymers: exchange doping of dye molecules into polymer matrix, 367
X-ray diffraction
Growth and characterization of $AlAs_xSb_{1-x}$ and $InAs_xSb_{1-x}$ thin films on GaAs and InAs substrates, 52
Deposition and characterization of multilayered TiN/ZrN coatings, 124
Structure and elastic properties of thin alloyed gold films, 198
Epitaxial metal/insulator superlattices of Ti–Ag/MgO grown on MgO(001) substrates, 249
Amorphous alloy formation and thickness dependent growth of Gd–silicides in solid phase thin film reaction, 417
X-ray photoemission
Depth-profiling via X-Ray photoemission and Auger spectroscopies of N^+ implanted tungsten carbides grown on the Ti–6Al–4V alloy, 477
XRD
Electromigration in gold thin films, 189

YS2
Yttria-stabilized zirconia obtained by MOCVD. applications, 241
YSZ
Study of material emission in ArF and KrF excimer laser ablation of yttria stabilized zirconia single crystals, 108

Zinc
Optical properties of zinc oxynitride thin films, 322
Zinc sulfide
The gas-phase condensation method for the preparation of quantum-sized ZnS nanoparticles, 497
